

Tanzania – Kilimanjaro (Ages 13-15)

Global Youth Tobacco Survey (GYTS)

FACT SHEET

The Tanzania - Kilimanjaro GYTS includes data on prevalence of cigarette and other tobacco use as well as information on five determinants of tobacco use: access/availability and price, environmental tobacco smoke exposure (ETS), cessation, media and advertising, and school curriculum. These determinants are components Tanzania - Kilimanjaro could include in a comprehensive tobacco control program.

The Tanzania - Kilimanjaro GYTS was a school-based survey of students in Class 6 & 7, and Form 1 & 2 conducted in 2003.

A two-stage cluster sample design was used to produce representative data for Tanzania - Kilimanjaro. At the first stage, schools were selected with probability proportional to enrollment size. At the second stage, classes were randomly selected and all students in selected classes were eligible to participate. The school response rate was 100%, the student response rate was 93.7%, and the overall response rate was 93.7%. A total of 1,384 students aged 13-15 participated in the Tanzania - Kilimanjaro GYTS.

Prevalence

- 6.9% of students had ever smoked cigarettes (Boy = 11.4%, Girl = 5.7%)
- 8.3% currently use any tobacco product (Boy = 10.0%, Girl = 8.7%)
- 1.6% currently smoke cigarettes (Boy = 3.2%, Girl = 1.3%)
- 7.3% currently use other tobacco products (Boy = 7.9%, Girl = 7.7%)
- 4.6% of never smokers are likely to initiate smoking next year

Knowledge and Attitudes
