Situation update

Ebola virus disease (EVD) continued to increase with 422 cases and 242 deaths in the Democratic Republic of Congo, as of 27 November 2018. The risk of spreading in neighbouring countries, including South Sudan, remains very high. The Government of South Sudan and partners are engaged in EVD preparedness activities, including strengthening coordination through national task-force and state task-forces. Technical Working Groups (TWGs), such as Case Management, Infection Prevention Control (IPC) and Water Sanitation and Hygiene (WASH); Risk Communication; and Epidemiology and Surveillance are established. These TWGs are aligned to key strategic interventions to ensure efficient programming.

**KEY FIGURES**
- **2.87 million** People at risk in 22 counties
- **39** Screening points identified; 17 are functional
- **579,716** Incoming travellers screened
- **26** Experts in-country, mobilized by partners to support preparedness
- **26** Rapid Response Teams trained
- **6,700** Leaflets + 20 banners printed and distributed
- **1,035** Personal protective equipment prepositioned in high-risk states
- **18** Alert cases reported; 8 met case definitions but were tested negative

**FUNDING**

**Funding status (US$ million)**

- **US$ 7,866,962** (48%) funding gap
- **US$ 8,466,131** (52%) funded
- **16.33m** funding required

**Funding by area (US$ million)**
