JOINT PRESS RELEASE

Kampala, 20 July 2019:-- Clarification on the movements of an Ebola Virus Disease case who recently died in Democratic Republic of Congo (DRC)

The Ministry of Health and the World Health Organisation in Uganda were alerted of a 22 years old lady with history of travelling to Uganda from DRC and who later died in DRC and was confirmed EVD positive. Our Surveillance Teams immediately began investigating and ascertaining the various locations where this Lady visited and possible contacts arising from her business movements in Uganda.

In the process of investigation and contact tracing our Teams interacted with various people who were knowledgeable about the deceased lady movements. Various rumours and unverified information were gathered by our Surveillance and contact tracing Teams, among which was allegation that the deceased Lady travelled to Goma and Gisenyi.

We have since revisited this information and at this point cannot confirm or verify that the said Lady travelled to Gisenyi, as alleged.

We therefore regret and retract information that appeared in our Situation Report (Sitrep no #36), which caused an impression of confirmed travel by the deceased lady to Gisenyi in Rwanda, which information was from community informants and is not verifiable at this moment.

Suffice to note that our surveillance teams receive information on a daily basis in regard to movements of suspect, alert and confirmed cases from colleagues in DRC, and endeavour to investigate all received information (rumours & unverified) as is the practice and standard by WHO for ensuring highly sensitive surveillance systems. It's in this spirit that the unverified information of movement to Gisenyi and Goma was included in our Sitrep.

Following information sharing with investigation teams in DRC through WHO, we now believe the deceased lady did not travel to Gisenyi or Goma as earlier on suggested.

Dr. Aceng Jane Ruth  
Minister of Health

Dr. Yonas Tegegn Woldemariam  
WHO Country Representative - Uganda
