

ABORTION HEALTH PROFILE

SOUTH SUDAN 2019

1. General Statistics	
Total population (000's), 2019	11,062
Total female population (15 - 49 years) (000's), 2019	2,649
Unintended pregnancies (000's), 2019	30
Adolescent birth rate (per 1000 women aged 15-19 years), 2008	158
Proportion of women who make their own informed decisions regarding sexual relations (% of women aged 15-49 years), Null	

2. Legal status of abortion			
	Not specified	No	Yes
On request		×	
For economic or social reasons		×	
In cases of foetal impairment		×	
In cases of incest		×	
In cases of intellectual/cognitive disability of woman		×	
In cases of rape		×	
To preserve a woman's health		×	
To preserve a woman's mental health		×	
To preserve a woman's physical health		×	
To save a woman's life			✓
Other	○		

7. Available in National Essential Medicines List - (2007)

Misoprostol	×
Mifepristone	×
Misoprostol + Mifepristone combination	×

Legend

- Contraceptive prevalence - modern methods (%)
- Demand satisfied for modern contraception (%)
- Unmet need for family planning (%)
- Unsafe abortions averted (000's)

Definitions and abbreviations

Unsafe abortions averted due to modern contraceptive use: Number of unsafe abortions that did not occur during a specified reference period as a result of the protection provided by modern contraceptive use during the reference period.

Contraceptive prevalence - Modern Methods: Percentage of women of reproductive age who are using (or whose partner is using) a modern contraceptive method at a particular point in time

Unmet need: percentage of fecund women of reproductive age who want no more children or to postpone having the next child, but are not using a contraceptive method, plus women who are currently using a traditional method of family planning

FP - Family planning, **MMR** - Maternal Mortality Ratio
