

EBOLA VIRUS DISEASE

Republic of Uganda

Situation Report 85

Data update as of 30th December 2022 at 22 :00 HRS

Background

On 20th September 2022, the Ministry of Health declared an outbreak of Sudan Ebola Virus (SVD) after a case managed at Mubende Regional Referral Hospital (MRRH) in Mubende district was confirmed through testing at the Uganda Virus Research Institute (UVRI). This followed investigations by the National Rapid Response Team of suspicious deaths that had occurred in the district earlier in the month. This is the first time in more than a decade that Uganda reports an outbreak of Sudan ebolavirus

Key Highlights

Today marks 105 days of responding to the EVD outbreak and 33 days since the last confirmed case.

- ➔ Within the past 24 hours, there was no new confirmed case or death registered; there was no recovery.
- ➔ Case Fatality Ratio (CFR) among confirmed cases still stands 55/142 (39%).
- ➔ No active contacts are currently under follow-up.
