South Sudan: Cholera Outbreak Situation Report

Situation report: No. 12
Date of onset of outbreak: 22 February 2023
Reporting date: 20 March 2023
Data Source: State Ministry of Health and National Public Health Laboratory

Key Weekly Highlights as of 20 March 2023

- Nine (09) new Cholera cases have been recorded in the past 24 hours.
- 4 cases are currently admitted in the CTU.
- Zero new death has been recorded in the past 24 hours.
- Cumulatively, a total of 368 (Check the figure) cholera cases and 1 death (CFR - 0.3%) has been recorded since the onset of the outbreak.
- Overall, 195 (55%) of the cases are males and 167 (45%) are females.
- Children of age 1 - 4 years old are the most affected accounting for 71% (262) of the total cases reported followed by <1 years old 57% (173).
- Oral Cholera vaccination campaign commenced on 16 March 2023 targeting 53,000 individuals aged 1 year and above in the POC and Malakal town.
- Cumulatively, 29746 people have been vaccinated (Malakal town and POC) with OCV for 5 days s of the campaign achieving 44.9% coverage.
- The current cholera outbreak is localized in Malakal Upper Nile State on the side boarding Sudan.
Key Interventions

Coordination

- National and State Cholera Taskforce continue to meet regularly to provide operational and strategic guidance to the ongoing cholera outbreak response.
- A multisectoral National and State RRT continue to provide epidemiological investigation and technical support to the response interventions in Malakal County.
- A joint supportive supervision by MOH and WHO was conducted to the CTUs/CTCs and OCV Sites. The purpose of the visit is to provide strategic and technical guidance of the response.

Surveillance

- WHO and partners continue to update and support data verification, harmonization, and analysis across the response pillars.
- A joint active case search is being conducted by both National and State RRT teams at health facility and community levels in Malakal County.
- Surveillance heightened in at-risk locations bordering Malakal in Upper Nile State.
- WHO is supporting the orientation of the State Ministry of Health (SMOH)-Monitoring and Evaluation (M&E) team, and the MSF-Spain team on the electronic data collection tool or platform (EWARS) to populate the cholera line-list.

Case management

- Nine new cases with 4 cholera cases admitted at the CTU.
- MSF is supporting case management at the CTU in Malakal town and POC.
- A technical team consisting of MOH and WHO Country Office has been deployed to Malakal to support ongoing response.
- Rehabilitation of the COVID-19 isolation center (Malakal POC) and CTC in Malakal hospital is ongoing.
- The state ministry of health with support IMC continue to conduct triage in health facilities for cholera and referring cases to Malakal Teaching Hospital.
- The SMOH with support from WHO and partners continue to set up handwashing facilities at established ORP sites in the affected areas.
- MOH and WHO have scheduled a five-day training on cholera case management starting on 22nd March 2023.
- The SMOH with support from WHO continue to preposition standardized Case Management charts and cholera Case Definition to CTUs (HFs, and ORPs and CTUs/CTCs).
Infection Prevention & Control/WASH

- Hand washing facilities with soaps were distributed to 36 government institutions in Malakal town, 16 points of entry and 4 IDPS sites.
- Training of 7 water operators on water quality testing was conducted with support from IOM lab technicians.
- Ongoing construction of 2 public tap-stand concrete platform with 12 taps at Daniel Comboni IDP Site 1.

Risk Communication & Community Engagement (RCCE)

- Radio talk shows and jingles spots are ongoing.
- RCCE TWG developed a communication plan to guide the implementation of targeted communication activities aimed at changing hygiene behavior and practices for the prevention and control of cholera.
- 142 (98 females and 44 males) were reached with cholera key messages and preventive measures awareness. The cumulative number of people reached with preventive messages is 1477 (640 Males and 837 Females)
- SSRC had assigned 10 Social mobilizers volunteers in Malakal & POCs in different 5 locations.
- Ongoing daily Hygiene promotion activities on key cholera messages (causes, symptoms, and prevention measures), and airing of pre-recorded cholera preventive measures (Nile FM Radio).

Laboratory

- MOH with support from WHO continue to provide orientation to partners on sample collection, filling of cholera investigation forms, and testing using RDT in the affected location and at-risk counties.
- Forty-three (43) samples have been tested on RDT since the onset of the outbreak with eight (8) samples testing positive on RDT and thirty-five (35) testing negative
- Thirteen (13) samples tested on PCR where three (3) tested positive and ten (10) tested negative. All the 13 samples tested negative for vibrio cholerae on culture.
- Three (03) lab technicians (1 from NPHL and 2 from WHO) have been deployed to support sample collection and management in Malakal.
- Ongoing support to the laboratory capacity of partners (MSF, IOM, and IMC) to conduct RDT for cholera cases.

Oral Cholera Vaccination (OCV)

- The oral cholera vaccination campaign was officially launched on 16th March 2023.
- Some 29746 people have been vaccinated both in the POC and Malakal town with a coverage of 44.9% in 5 days.
The OCV campaign will be extended for an additional 5 days to ensure adequate coverage.

- WHO submitted a new request of 200,000 doses of OCV to the International Coordination Group (ICG) for additional oral cholera vaccines.

**Logistics and supplies**

- WHO hired 2 additional vehicles to support response activities in Malakal.
- WHO is dispatching 1 x 48sqm and 1 x 24sqm medical tents to Malakal to support the ongoing Cholera response.
- WHO has dispatched additional cholera treatment and investigation kits to Malakal.

**Challenges**

- Inadequate access to safe and clean water due to limited WASH supplies.
- Sub-optimal risk communication and community engagement in cholera affected high-risk locations.
- Inadequate RDT testing of suspected cholera cases at the subnational level, most especially, in health facilities and treatment centers.
- Inadequate funding for partners to respond to the cholera outbreak in Malakal.
- Lack of designated ambulance to facilitate referral of cholera cases and designated vehicle for the safe dignified burial (SDB) team.
- Identification of personnel to be trained safe and dignified burial (SDB).
- Overcrowding in the POC due to the continued influx of IDPs poses a major challenge to the limited WASH facilities in the POC.
- Inadequate cholera kits and investigation kits for the cholera outbreak response.
- Case management charts are in English making it difficult for healthcare workers who only understand Arabic.

**Way forward**

- Translation of case management charts into Arabic language to facilitate easy understanding by healthcare workers.
- Provision of adequate clean and safe water, especially in the cholera outbreak and high-risk locations.
- Enhance cholera RDT testing of suspected cholera cases at health facilities and treatment centers.
- Accelerate RCCE interventions at POC and Malakal town.
- Finalize the cholera response plan and budget for resource mobilization.
- Provide a designated ambulance to support the referral of cholera cases.
- Identify and train safe and dignified burial (SDB) teams.
- Raising the 02 emergency 10M³ Bladder collapsible tank platform- each with mud soil filled in sandbags for 1.5 height to give a good flow of water during fetching
- Dismantle the existing water supply pipeline at Bam from St. Andrew primary school- Daniel Ccomboni Community tap-stand and reconnect with the same pipeline diameter for good flow pressure at the collection point.
- Training of mobile sanitation community committee on basic sanitation topics and messages prior to general clean-up campaign to maintain clean environment.
- Decommission of non-functional latrines in the PoC
- Coordination with MSF on WASH NFI distribution targeting the affected cases after discharge.
