

Chairperson,
Honorable Ministers,
Director General,
Ladies and Gentlemen.

Liberia is pleased to express her appreciation to the Director General for her glaring yet succinct deliberation on what WHO/AFRO has accomplished during these Challenging times globally.

In Liberia, the Impact of WHO/Afro is felt not only with some resources but the appointment of Dr. Peter Clement who has worked with us during Ebola and now working with us as a Team that is gradually making some significant progress against COVID-19 not being complacent because it is not over until it is over.

As we conglomerate through this visual field, it is critical that WHO continues to drive technological innovative means that will impact us in sharing best practices in dealing with both epidemics and building health systems.

As we continue to battle COVID-19, I plead with my colleagues not to forget about routine health services and we look forward to WHO Afro to share some best experiences with us.

I wish to express special thanks to the Secretariat. Liberia stands ready to share her experiences.

I Thank You, Madame Chair.
